Kitchen

Dining Room

The Pedersons designed their floor plan with the master suite on one end of the home (including a laundry room), the guest suite on the opposite end, and the living spaces (dining room, living room and kitchen) in the center.

While deciding on what products to use in their new dream home, the Pedersons realized they needed the help of an interior designer, so they hired iSpace of Fayetteville.

"Understanding now what a registered interior designer brings to a project, we wish we had hired iSpace before the foundation was poured," says Beckii.

The home has a peaceful atmosphere and ambiance, with natural and organic travertine running throughout. The kitchen has a warm feel with rich cherry cabinets and a distressed black center island, both installed by Kitchen Distributors. The Pedersons chose the cappuccino travertine and Sierra Brown granite countertops from Tune Tile & Granite and added accessories in bold colors.

Beckii and Steve wanted to create a large, inviting kitchen to entertain family and friends. Sharing a passion for cooking, the couple chose high-end appliances from Metro Builders Supply in Springdale.

"Since everyone ends up in the kitchen, we wanted to bring the eating, visiting, watching television and grandkids running around all together in one large, open room," Beckii shares. And that's why the living room is simply an extension of the kitchen.

High Quality Fabrication and Professional Installation of Natural Stone Countertops

New 3,000-square-foot showroom with a wide variety of unique products:
